Silent Steep C

Silent Steep C Climbing Helmet

The impact resistant Silent Steep C is a vented climbing helmet designed for industrial use and conforming to EN12492. The strength of Silent Steep C's lightness is made possible by the polyamide insert, which absorbs impact forces. The strong chinstrap, which releases above 600N (50kg), ensures that the helmet stays on your head in the event of an impact. This makes it an ideal work at height helmet and also a technical rope rescue helmet.

Silent Steep C

In order to prevent the discomfort that may occur during working in hot and humid weather, Silent Steep C; There are 6 ventilation holes on the sides and 4 on the back.

Certified by : MNA Lab. (NB2841)

Silent Steep C

Top quality comfort pads with sweat absorbing feature used on EPP Foam can also be easily removed and washed when desired.

Safety Earmuffs can be mounted on the Silent Steep C helmet whenever desired.

A head lamp can be attached to the Silent Steep C, which has an extremely ergonomic design.

Silent Steep C

High quality PA6 raw material ratchet system and knob that allow adjustment for perfect fit.

Very strong neodymium magnetic buckle to provide confidence and convenience to the user. You can attach and remove the chin strap using only one hand.
